High Performance Color Coating Systems

Building Envelope Design Solutions

Standard Colors

Sherwin-Williams® WeatherXL™ – Siliconized Modified Polyester (SMP)

WeatherXL™ coating systems utilize inorganic pigments offering superior color stability, chalk and fade resistance as well as gloss retention.

SMP

Interior application only, no warranty applies.

Sherwin-Williams® Fluropon® Solid PVDF Colors (Unless otherwise noted as Illumipon™ FEVE*)

Fluropon coatings are durable polyvinylidene coating system containing 70% PVDF resins and inorganic pigments. This system provides a powerful chemical bond, superior resistance to ultraviolet radiation resulting in exceptional color retention, resistance to chalking and chemical degradation.

SR (Solar Reflectivity)

This is the ability of a material to reflect solar energy back into the atmosphere. Rated on a scale from 0 to 1, where 1 is the most reflective.

E (Emissivity)

Emissivity is the ability of the material to release absorbed energy back into the atmosphere. Rated on a scale from 0 to 1, where 1 is the most emissive.

SRI (Solar Reflective Index)

This is used to determine compliance with LEED® requirements and is calculated according to ASTM E 1980 using values for reflectance and the material's ability to release absorbed energy (emissivity) in medium wind speed conditions. Rated on a scale from 0 to 100, where 100 is the most reflective.

* Illumipon™ is a FEVE (FluoroEthylene Vinyl Ether) resin-based coating that is highly resistant to weathering, airborne chemicals, acid rain and most cleaning solvents used to remove graffiti. It is a two-coat system that can be formulated in a wide range from low to high gloss.

Premium Colors

Sherwin-Williams Fluoropon Classic II - 70% PVDF Mica Colors

The coating system consists of a special primer and a durable color coat containing mica pearlescent flakes. Due to the orientation of aluminum / pearlescent flake pigments during application, the appearance will be directional in nature on metallic coatings.

					
Silversmith Code: 439RZ1541M SR:0.53 E:0.79 SRI:59	Zinc Code: 439Z618M SR:0.55 E:0.79 SRI:62	Champagne Pearl Code: 439ZZ098M SR:0.48 E:0.81 SRI:53	Champagne Bronze Code: 439RZ1571M SR:0.44 E:0.78 SRI:46	Weathered Zinc Code: 439RZ1563M SR:0.33 E:0.84 SRI:33	Copper Penny Code: 439RZ1543M SR:0.48 E:0.84 SRI:54

Sherwin-Williams Fluoropon Classic - 70% PVDF Metallic Colors

Metallic coatings employ metal flakes in the color coat. The system uses a special primer, a 70% PVDF resin based Fluoropon color coat and a clear topcoat, to provide outstanding color and gloss retention, increased abrasion resistance and added protection against atmospheric contaminants.

					
Bright Silver Code: 439RZ11101MD SR:0.55 E:0.85 SRI:64	Rosalind Rose Code: 439Z11256MD SR:0.32 E:0.88 SRI:34	Champagne Gold Code: 439RZ11195MD SR:0.49 E:0.88 SRI:56	Pewter Code: 439RZ11096MD SR:0.41 E:0.89 SRI:46	Medium Bronze Code: 439Z11255MD SR:0.15 E:0.89 SRI:12	Dark Bronze Code: 439Z11254MD SR:0.08 E:0.89 SRI:3

The appearance of mica and metallic colors may vary from batch to batch due to the variability in the random orientation of mica mineral pigments and metallic flakes used in the manufacturing process. To achieve the best result for your project, thoughtful planning is highly recommended, particularly if the project is phased. Please speak with your Kingspan representative for advice and guidance.

Granitstone®

Granitstone® coatings have an oven-baked epoxy primer and a factory applied finish of an air-dried 100% acrylic bonder with natural silica aggregate, minimum 12 mils dry film thickness, finished to resemble sprayed stucco.

Granitstone®

				
Imperial White	Bone White	Sandstone	Parchment	Rawhide
				
Surrey Beige	Taupestone	Dove Gray		

Granitstone® Quartz
